

### About

The Engage2Change Men's Behaviour Change Programs are for men who want to stop using violent, coercive, and controlling behaviours in their intimate partner relationships and families.

### Group

The Men's Behavior Change group program is a 19-week engagement that provides men a safe space to examine the impacts of their violence and develop healthy, respectful relationships. It is aimed at men ready to take responsibility for their actions, offering a unique, collaborative experience based on Assessment, Group Work, and Safety/Accountability.

### Case Management

Intensive Case Management (ICM) is an individual and personalized support service to assist men with complex needs.

### Family support

As part of the program, men are asked to provide the contact details of their current and/or ex-partner. Depending on the circumstances, the Women and Children's Advocate (WCA) will offer support to the women and children during the program. The focus of the Engage2Change programs is the safety of women and children.
